

Mohamad Jaelani

Senior Software Engineer | Java, Spring Boot & Microservices

Bogor, Indonesia • j43lani@gmail.com • +62 895 3293 76611 • linkedin.com/in/mohamad-jaelani-89377b242 • github.com/mohamadjaelani

PROFESSIONAL SUMMARY

Software engineer with 9+ years of experience building backend systems in Java and Spring Boot, focused on microservice architecture, API integration, and enterprise middleware. Delivered host-to-host REST APIs, PDF document-generation services, and customer-facing platforms for Allianz Indonesia, running on OpenShift and AWS EKS with containerized CI/CD pipelines. Earlier work covers Enterprise Service Bus development, Apigee API management, Kafka streaming, and IoT integration. Seeking a senior backend or integration engineering role where deep systems-integration experience delivers reliable, scalable services.

TECHNICAL SKILLS

Languages Java 8/11, JavaScript, SQL, C#, Python, PHP, HTML5, CSS

Backend Spring Boot, Node.js, REST, SOAP, Microservice Architecture, Enterprise Service Bus (ESB)

Frontend Angular 16, jQuery, Bootstrap, CodeIgniter

Integration Apigee API Management, Apache Kafka (Confluent, MSK), Qlik Replicate (Attunity), MQTT, AS2, ISO 8583, SAP JCo, MuleSoft 4

Cloud & DevOps AWS (EKS, S3, CloudFront, RDS), OpenShift, Docker, Jenkins, GitLab CI, Skaffold, Terraform, Scalr, SonarQube

Databases Oracle, PostgreSQL, MySQL, MS SQL Server

Testing & Tools Apache JMeter, Postman, SOAP UI, IntelliJ IDEA, Eclipse/STS, VS Code, Git (GitLab, GitHub), Jasper iReport

Practices Agile/Scrum, CI/CD, Code Quality Analysis, Technical Documentation

PROFESSIONAL EXPERIENCE

PT Accenture Indonesia

Jul 2025 – Present

Custom Software Engineering, Senior Analyst

Client: PT Danantara Indonesia (Aug 2026 – Present)

- Test the IPP and DMP applications across functional and integration cycles, logging and tracking defects through to release.

Client: PT Asuransi Allianz Life Indonesia (Jul 2025 – Jul 2026)

- Developed and deployed host-to-host REST APIs in Java and Spring Boot connecting Allianz to external partner systems.
- Built a PDF document-generation service for policy and customer correspondence.
- Developed backend services and the Angular frontend for ELLISE (*ellise.allianz.co.id*).
- Published and managed API proxies on Apigee, and configured Qlik Replicate tasks for change-data capture between Oracle and PostgreSQL.
- Deployed containerized services to OpenShift and AWS EKS, including EKS Ingress configuration and Terraform-managed infrastructure.
- Optimized existing services, improving response time.

Tech: Java, Node.js, Angular, Spring Boot, JavaScript, HTML, CSS, IntelliJ IDEA, STS/Eclipse, VS Code, JMeter, Postman, SOAP UI, Docker, Jenkins, SonarQube, OpenShift, AWS EKS, S3, CloudFront, RDS PostgreSQL, Oracle, Kafka (MSK, Confluent), Qlik Replicate, Apigee, GitLab, GitHub, Terraform, Scalr.

PT Asuransi Allianz Life Indonesia

Nov 2023 – Jun 2025

Software Engineer

- Designed and built the initial host-to-host REST API layer on Spring Boot using microservice architecture, establishing the integration patterns later reused across the platform.
- Implemented the PDF document-generation module used for automated policy document delivery.
- Delivered backend and frontend features for ELLISE (*ellise.allianz.co.id*), Allianz Indonesia's.
- Set up Apigee API proxies, Qlik Replicate replication tasks, and EKS Ingress routing for new services.
- Migrated and deployed workloads across OpenShift and AWS EKS.

Tech: Java 11, Angular 16, Spring Boot, IntelliJ IDEA, VS Code, Skaffold, Docker, Jenkins, SonarQube, OpenShift, AWS EKS, S3, RDS PostgreSQL, Oracle, Kafka (MSK, Confluent), Qlik Replicate, Apigee, GitLab, GitHub, Terraform, Scalr.

PT Tata Consultancy Services Indonesia

Nov 2022 – Nov 2023

Backend Developer / IT Analyst

- Delivered REST APIs on Spring Boot with a microservice architecture for Allianz Indonesia under a one-year client engagement.
- Containerized and deployed services to OpenShift, integrating Confluent Kafka and Qlik Replicate for asynchronous data flows.
- Applied Agile delivery practices and development standards that shortened project delivery cycles.

Tech: Java 11, Spring Boot, IntelliJ IDEA, Skaffold, Docker, OpenShift, PostgreSQL, Oracle, Confluent Kafka, Qlik Replicate, GitLab, Apigee.

PT Uncal Digital Technology

Sep 2018 – Oct 2022

Java Developer

- Core developer of Uncal, a proprietary Enterprise Service Bus (ESB) engine for enterprise system integration.
- Built the full adapter suite: web services (REST, SOAP), email (IMAP, POP, SMTP), file transfer (NFS, FTP, FTPS, SFTP, SSH), messaging (MQTT, Kafka), SharePoint, AS2, TCP/IP, RTSP, JDBC, and SAP JCo.
- Developed data converters between XML and SQL (MS SQL, MySQL, Oracle, PostgreSQL), JSON, ISO 8583, SOAP/WSDL, TPSONline (Indonesia Customs), and ASCII/EBCDIC for AS/400.
- Wrote a MuleSoft 4 plugin for PGP encryption and decryption, and a SeeBurger plugin for Silverlake message generation and conversion.
- Developed IoT device integration using ESP-01 Wi-Fi modules and DHT-11 sensors with MQTT-based telemetry.

Tech: Java 8, MySQL, MS SQL, Oracle, PostgreSQL, Eclipse, Arduino IDE, GitLab, GitHub, Postman, SOAP UI, SAP GUI, Mosquitto, Kafka, MQTT Explorer, Apache JMeter, MuleSoft 4, Office 365.

CV Ekamatra Polygon

Sep 2016 – Sep 2017

Web & Android Developer

- Developed web applications and supporting web services for client projects.
- Built Android mobile applications with map integration (Google Maps, OpenStreetMap).
- Wrote stored procedures and reporting queries across Oracle, PostgreSQL, and MS SQL Server.

Tech: Java 7, Android Studio, C#, Python, PHP, CodeIgniter, HTML5, CSS, Bootstrap, JavaScript, jQuery, PostgreSQL, MS SQL, Oracle, Jasper iReport, Google Maps, OpenStreetMap.

ADDITIONAL

- Bahasa: Indonesia (native), English (professional working)

EDUCATION

Universitas Islam Indonesia

1996 – 2002

Bachelor of Economics • Yogyakarta, Indonesia • GPA 3.13 / 4.00
